<i>Hold & Serve Drawers</i>			
HB Series (all models)	\$200		

Trade-up Procedures

1. One form per trade-up related purchase order is required.
2. Contact your Winston sales rep to identify and qualify trade-up opportunity, and calculate rebate amount. Any existing piece of equipment to be considered for the trade-up must be a similar piece of equipment (holding cabinet for holding cabinet, etc.), unless approved by Winston Distribution. It is allowable to trade up a cooking unit for a therm & hold.
3. Your Winston sales rep will qualify the trade-up equipment and fill out the rebate form to include all contact information, equipment brand and description, location/address of equipment, model number, serial number, and Winston model to be purchased.
4. Your Winston sales rep will fax your order to the factory with the completed rebate form. The rep will also mail a hard copy of the order, old serial tag, and the rebate form to Winston Distribution.
5. Winston reserves the right to disapprove rebate applications. If there are any discrepancies contained in the rebate form, the rep will be notified immediately.
6. Winston equipment is delivered, received and installed according to purchase details. Your Winston sales representative will provide training on the unit. A follow-up visit will be performed within one month of installation.
7. Winston Accounting Department will issue the trade-up rebate after receipt of payment for the trade-up equipment. Allow 6-8 weeks from receipt by Winston of invoice payment for issuance of trade-up payment.
8. Completed trade-up forms must be received within 90 days of the invoice date. Forms received beyond 90 days will be rejected. Orders must be paid in full (by applicable dealer) before checks are remitted to the end-user.
