

Winston Develops New CVap® Holding Cabinet

Louisville, Kentucky. February 2009 - Winston Industries has introduced a new design to their CVap® product line. The Universal Holding Bin (UHB) cabinets were unveiled at the 2009 NAFEM show in Orlando, Florida.

UHB cabinets feature a unique bin configuration that allows operators to serve directly from the cabinet, without disturbing the optimum holding conditions in the other bins.

A digital multi-timer allows the simultaneous tracking of up to 16 different food products. The ability to serve multiple foods from the same cabinet reduces labor and increases efficiency. Operators can assign up to six unique alarm tones, simplifying the implementation of a first-in-first-out (FIFO) system.

The UHB cabinet is available with four or eight bins, which are designed to hold industry-standard 2.5" (64mm) deep shotgun pans or hotel pans.

About Winston Industries

Winston Industries, LLC is an international manufacturer and distributor of foodservice equipment. Founded in Louisville, Kentucky in 1969, the company manufactures Collectramatic® and CVap foodservice equipment. Additional information about Winston Industries is available at www.winstonind.com.
